	40mm				
	25mm				
	TOW				
	AT-4				
	SMAW				
	LAAW				
	Other:				
Example Below					
X	40mm	480	HEDP	B546	M433

1. EOD support requests are required no less than 3 working days prior to Date of Support
2. Face to face link up with EOD is highly recommended.
3. Targets will not be staked into the ground in impact areas, all targets will be propped up. Shovels and hammers, will not be taken into the impact areas. Sandbags will never be filled in impact areas.
4. To enter impact areas, units must have EOD, Corpsman, working party who will wear flak and kevlar, target materials as required, and transportation for personnel and target materials.
5. Units are ultimately responsible for target locations, EOD will advise but, if during firing damage occurs to ranges (i.e. Signs, Sandbags, Bunkers, etc) units are responsible for cost to repair or replace items/facilities.
6. Target inserts/extracts must be completed between 0600-0700, 1200-1300 or 1600-1800. EOD will not conduct target insert/extract at night due to UXO contamination on all ranges.

By signing I have read and fully understand and will comply with all above listed notes.
